

XTRONS Single Din Car Stereos Face Panel Installation and Screen Angles Adjust

XTRONS has offered many different single din car stereos to meet the demands of our customers. Different from OEM (original equipment manufacturer) units, single din car stereos are universally fit and most have a detachable face panel. On the higher end single din car stereos, the viewing angles can be adjusted on the 7" motorized screen. Here is a video on how to install the face panel and adjust the screen viewing angle on some of XTRONS single din car stereos. The following video is applicable for these XTRONS models: D788A, D766A, D716G, D714A, D714SGS, D719G, D719A, D717AL and more.
